

## MedECC Special Report

### Climate and Environmental Coastal Risks in the Mediterranean

#### List of Authors

An open call for self-nominations of authors was initiated on 20th April 2021 and terminated on 15th May 2021. The MedECC Scientific Steering Committee appointed the Coordinating Lead Authors (CLA) and Lead Authors (LA) considering a range of scientific, technical and socio-economic views and backgrounds, as well as geographical and gender balance. Coordinating Lead Authors and Lead Authors are responsible for the content of each chapter and draft specific sections based on their area of expertise. The Coordinating Lead Authors oversee the process and are responsible for the coordination of the chapters. The Lead Authors work in teams to produce the content of the chapter on the basis of the best scientific, technical and socio-economic information available. Coordinating Lead Authors and Lead Authors may enlist other experts as Contributing Authors to assist with their work. 55 authors (29 women and 26 men) from 17 countries are contributing, with the following proportions by region: Northern Mediterranean Countries (65% of authors), Southern and Eastern Mediterranean Countries (24%), Other Countries (outside the Mediterranean region) (11%).
